

## WHAT BELEGGO OFFERS

# One local engine to validate, fix and create every EU e-invoice

### VALIDATE · 5 LAYERS

#### Know in seconds

XSD → EN 16931 → PDF/A-3 container → page ↔ XML → B2G preflight. **1,749 rules**, every error mapped to the exact field, in plain language.

### FIX

#### Invalid → valid

One-click safe repairs, a guided editor and a normalize tier — no developer, and no monetary value ever changed.

### CREATE & CONVERT

#### Make a valid one

A simple form → a valid XRechnung or ZUGFeRD/Factur-X PDF. UBL ↔ CII ↔ ZUGFeRD, re-checked after every conversion.

### 8 FORMATS · 1 ENGINE

#### All of Europe

XRechnung · Peppol BIS 3 · NL / RO / HR / PT CIUS · EN 16931 core. Invoices generate in **DE · EN · FR**.

### PRIVATE BY DESIGN

#### No upload, ever

Runs in your browser, desktop or terminal. No account, no cloud, no tracking — GoBD-friendly by architecture.

### PROVEN

#### Checked vs the officials

Cross-validated with KoSIT, Service-BW, the EU ITB & VeraPDF — **13/13 agree**, 208 samples, 0 disagreements.<sup>1</sup>

## HOW TO USE IT

# Drop a file in → get a verdict. Then fix it, or build one from scratch.

### WEB STUDIO

#### Nothing to install

Drag an XRechnung, ZUGFeRD or Peppol file into the browser → an instant verdict. Offline PWA, **free forever**.

### DESKTOP APP

#### mac · Windows · Linux

Batch-validate a whole folder, watch an inbox, native drag-&-drop. [Pro](#)

### COMMAND LINE

#### In your CI

```
beleggo validate / fix /  
generate
```

 — one binary, no JVM, scriptable over a whole pipeline.

### AI AGENT · MCP

#### Let the AI check it

A local MCP server so Claude or any AI validates & fixes invoices — without uploading a single byte.

### CLICK THE ERROR

#### See the field

Every issue points at its box in the readable invoice — [BT-10 missing](#) lights up the field, and links to the rule library.

### ONE-CLICK FIX

#### Or a guided editor

Every issue is classified [auto](#) [input](#) [manual](#) — you always know the next step.

## WHAT IT COSTS

# Pay once. No subscription trap.

FREE · FOREVER

**€0**

Web studio · CLI · MCP  
server. Validate & create,  
no limits on the essentials.

PRO · PAY-ONCE

**€99**

Desktop batch & watch ·  
PDF branding + payment  
QR · unlimited saved  
invoices. Incl. 12 mo of rule  
updates.

KANZLEI / KIT

**€390–1.5k<sub>/yr</sub>**

Tax practices, QA & data-kit  
teams — batch a  
Mandanten folder,  
letterhead reports, multi-  
seat.

OEM / WHITE-LABEL

**€2.9–15k<sub>/yr</sub>**

Embed the engine or resell  
the whole studio under  
your own brand.

Rule updates after year one: €29/yr — the legislator sets the upgrade cycle, so your validator never quietly goes stale. Everything above Pro includes updates only while subscribed (the `artefactsUntil` license claim).
